Stellar Phoenix PST Repair

Outlook PST Recovery in 3-Simple Steps:

- Locate PST : As the PST Recovery Software is launched, the user receives a 'Select Outlook Data File ' dialogue box. If the box is closed, one can reopen it from 'Open Outlook File' option of 'File' menu or 'Open a Outlook File to Repair' toolbar option. The dialogue box gives two options to 'Select Outlook File' (used to browse when exact PST location is known) and 'Find Outlook File' (used to search the disk for *.pst files). To start the PST Repair, click 'Start' button.
- 2. Restore PST : To save the scanned file, click 'Save Outlook File' from the toolbar option. A dialogue box appears asking for a 'Destination Path', which is the same as of root by default. The user can browse to the desired location with the provided option. The recovered file will then be restored at the specified location with the original name, followed by word- 'Recovered' and extension .pst.
- 3. Import PST : To regain access to your emails and other PST objects after Outlook PST Recovery, you need to import the restored PST in Microsoft Outlook. For this, you can start MS Outlook to launch the Import and Export wizard and specify the recovered PST file path.

Stellar Phoenix Outlook PST Repair v4.0 is an Outlook Recovery Software with a GUI equipped of various options. The software has a 3-pane structure view to display individual folders, expanded folder information (including sender and recipient addresses, email Subject and Date) and preview of selected PST object. At the leftbottom side, the user gets direct tabs for Mail, Calendar, Contacts, Tasks, Notes and Journal, similar to Outlook.

The PST Recovery tool gives different menubar and toolbar options as follows :

Open Outlook File : The first toolbar option that opens Select Outlook Data File ' dialogue box to manually select or find the PST on disk.

Save Outlook File : The second toolbar option that allows you to save the scanned file at desired or root location.

Switch Reading Pane : The toolbar option switches the emails' view in right-pane from horizontal to vertical columns and vice-versa, which is horizontal by default.

Log Report : The top menubar gives 'View Log Report' and 'View Recovery Details' options under 'View' to respectively show log report and recovery details (same as mentioned in Restore PST step) generated by Outlook Recovery Software.

Stop Recovery Process : The toolbar menu gives you an option STOP the scanning process in between. The items till scanned will be displayed in tree structure.
