Diagnose & Fix PC Problems

- **One-Click PC Maintenance**
Five easy-to-use Wizards allow you to fix, clean, optimise or protect your system or perform a comprehensive system tune-up.
- **Diagnose & Fix Windows Problems**
Runs 250+ tests to uncover problems that slow down your computer and fixes all of them so that your computer runs again like new.
- **Speed up PC Performance**
System Suite finds and removes wasted disk space, repairs hard drive problems and speeds up Windows startup.
- **Hardware Diagnostic Tests**
System Suite checks your system hardware such as memory, hard drives, network cards and more to ensure everything is working properly.
- **Registry Repair & Maintenance**
Speed up your PC performance by defragmenting, cleaning, fixing and optimising your Windows® registry.
- **Active Intelligence**
System Suite's "Active Intelligence" monitors hard drive status, available disk space, hard drive fragmentation, registry errors, excess temp files and startup applications. System Suite enables users to reduce start up times by 25%, improve read-write performance by 20% and prevents data loss by identifying hard drive problems before they happen.

Performance & Optimisation

- **System Optimiser**
Users can select profiles to optimise their systems for certain PC tasks, like Gaming, Multimedia, Office tasks and Security. One click and you're optimised for maximum performance.
- **Windows Optimiser**
Improve Microsoft Office Application security settings, Internet security settings, addresses registry vulnerabilities and cleans the printer queue. Microsoft Office and Internet browser have security flaws where hackers can send viruses and spyware through. System Suite fixes the security settings protecting you against attacks.
- **Memory Optimiser**
System Suite optimises the way Windows uses memory to improve system performance.
- **Internet Speed Optimiser**
Accelerate your browser, download and Web surfing speeds for Internet Explorer and Mozilla Firefox browsers by 80%.

Award-Winning Real-Time Security Protection

System Suite removes existing viruses, malware and spyware from your PC and prevents future infections by monitoring your computer for any malicious behaviour. Get real-time protection from viruses and spyware in email messages, attachments and Internet downloads.

➤ Virus, spyware & malware detection & removal

➤ Prevents rootkits and keyloggers from stealing personal data

➤ Real-time protection against any malicious activity

➤ Hourly updates to protect you against the latest threats

➤ Credit Card Transaction Security

Make online transactions safely and securely by encrypting credit card data. Spyware uses a keylogger to capture and record the keystrokes you enter on your keyboard. They can steal your identity, know your website passwords, record and then use your credit card information to make purchases illegally. Securely encrypt and store:

- ✓ Credit card information
- ✓ User names
- ✓ Passwords
- ✓ Social security numbers
- ✓ And more!

➤ Two-Way Personal Firewall

Defend your PC from hackers and malicious intruders. System Suite's two-way advanced firewall proactively monitors and defends your PC with multi-layered security protection.

➤ Anti-Spam Control

Stop spam, viruses and phishing emails so they never get to your inbox. Works with all major email programs including Outlook, Notes, Eudora, AOL, Hotmail/MSN and more.

➤ Fraud & Phishing Scam Prevention

System Suite's Web Defence technology integrates with major search engines to identify and block malicious web sites before you click, protecting you from hacked pages, phishing and fraud scams.

- ✓ Expands your threat protection
- ✓ Prevents attacks as you search and browse
- ✓ Checks search results and gives advance warning of dangerous sites before you visit them

➤ Internet Cleanup

System Suite helps prevent identity theft by wiping away your Internet tracks to improve performance and protect your privacy.

Data & File Recovery

➤ Windows Rescue CD

Fix and restore your PC when your computer won't boot with the included Windows Rescue CD.

➤ Recover Lost Photos, Music & Data

Accidentally deleted your photos, music or personal data? Instantly recover deleted files, photos, music, videos, emails and more with System Suite's built-in recovery features.

➤ Securely Erase Your Data

Help prevent your data from falling into the wrong hands by securely erasing data from your hard drive. You'll be protected from Identity Theft as File Shredder meets U.S. Department of Defense Security cleaning standards, ensuring that erased data is completely unrecoverable.

How It Works

Some programs fix just a handful of PC problems but don't find the problems that are plaguing *your* PC. But System Suite is the most comprehensive and No.1 best selling product of its kind. With System Suite anyone can maintain and repair their PC themselves.

➤ Scan & Identify Problems

With just one click, System Suite runs 250+ tests to uncover and identify the problems that are plaguing your computer

➤ Analyse, Fix & Repair

Analysis results are organised and easy-to-understand. You can let System Suite safely fix everything with just one click of the Repair All button, can optionally exclude items from repair, or even get further insight and selected targeted repairs.

➤ Or Automate it All with *Active Intelligence*

System Suite's *Active Intelligence* can automatically fix and maintain your computer keeping your PC running like new.

One-Step Maintenance Wizards

➤ Optimise Wizard

Optimises your hard drive and system registry for improved system performance.

➤ FixUp Wizard

Diagnoses system problems, fixes and repairs your Windows registry and tests your hardware.

➤ CleanUp Wizard

Backs up your system files, cleans out hard drive clutter and regains wasted disk space.

➤ Security Wizard

Detects, removes and immediately protects you from thousands of virus, spyware and malware threats.

"Comprehensive set of diagnostic tools"

Micro Mart Magazine

"A comprehensive and effective security and performance tool that doesn't require too much in the way of user input"

PC Utilities

"System Suite Professional does a great job. Not only does it secure your PC, it can also improve its performance, and diagnose and repair problems. It's comprehensive and easy to use."

Practical PC

What's New in Version 10?

- **New!** Windows 7/64-bit OS Support
- **New!** Auto Scan & Fix Your PC
- **New!** User Interface
- **New!** Detailed Reporting w/Email
- **New!** Registry Shortcut Fixer Tool
- **New!** Laptop Power Saving Tool

Active Intelligence - NEW!

System Suite's Active Intelligence™ technology maintains PC health by monitoring its performance and security silently in the background and then automatically runs the repairs your computer needs.

How It Works

When your computer is not in active use, Active Intelligence checks your computer's condition and compares it to performance standards. If a problem is detected, Active Intelligence will run the appropriate task to complete the repair.

Active Intelligence has three modes that can be selected:

1. Scan and Fix: Active Intelligence will scan and fix most problems automatically
2. Scan only: Active Intelligence will scan and provide results so the user can fix problems manually
3. Disabled: User will scan and fix problems manually.

Active Intelligence automatically:

- ✓ Scans and defragments hard drives
- ✓ Cleans and repairs the Windows registry by removing obsolete and invalid references
- ✓ Monitors and changes Internet settings to maximise Internet speed and stability
- ✓ Optimises Windows startup by removing unnecessary startup entries
- ✓ Checks to ensure anti-virus and anti-spyware threat definitions are up-to-date
- ✓ Checks how Windows is using system memory and optimises its performance
- ✓ Repairs Windows security vulnerabilities in operating systems and browsers
- ✓ Detects and removes unused temporary files that slow down PC
- ✓ Actively monitors your hard drive for problems
- ✓ Scans for security threats and quarantines any suspicious files
- ✓ Checks to ensure firewall is enabled

System Requirements:
Windows XP, Vista or 7, 64 MB
RAM, 56MB free hard disk space,
CD/DVD drive, internet
connection required for updates.
