

Guards your front door – stopping hackers and other intruders in their tracks.

- **Advanced Download Protection**  
Analyses browser downloads in three unique ways before they can infect your PC and warns if they are malicious.
- **Works with All Security Software**  
Compatible with all other software including your existing security, such as AVG and Norton Antivirus.
- **Automatic Program Control**  
See fewer alerts than with ZoneAlarm Free Firewall.
- **OSFirewall™** Monitors changes within your computer to spot and stop new attacks that bypass traditional anti-virus protection.
- **Anti-phishing and Site Status**  
Blocks fraudulent websites including "phishing" sites that trick you into entering personal data.
- **Two-way Firewall**  
Keeps hackers out by making your PC invisible online and blocking intrusions.

ZoneAlarm®, a Check Point Software Technologies, Inc. Company, is one of the most secure brands in consumer Internet Security. ZoneAlarm protects over 60 million PCs from viruses, spyware, hackers and identity theft. The award-winning Internet security product line is installed in consumer PCs and small businesses, protecting them from Internet threats. The ZoneAlarm family of products is among the most popular and successful Internet security products available on the market.

RRP (single-user licence): £34.94

Contact your reseller for multiple-user licence pricing.

## PC Security

### ➤ Operating System Firewall (OSFirewall™)

No anti-virus or anti-spyware product is 100% effective, so ZoneAlarm invented the OS Firewall. The OS Firewall monitors behaviours within your computer to spot and stop even the most sophisticated new attacks that bypass traditional anti-virus and security suites.

- ✓ **Advanced Access Protection** – specifically defeats new, advanced attacks that other firewalls miss like raw data access, timing, SCM and COM attacks.
- ✓ **0-Hour Protection** – prevents silent outbreaks from gaining system access even before the threat is known by other security programs
- ✓ **Program Control** – restricts programs from malicious activities, blocking attacks that by-pass other defences.
- ✓ **Early Boot Protection** – Uniquely protects your operating system during start-up before most security products have even loaded.

### ➤ 2-Way Firewall

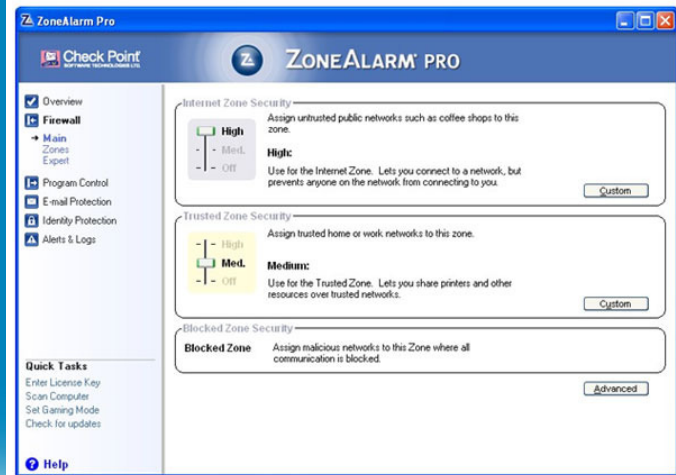

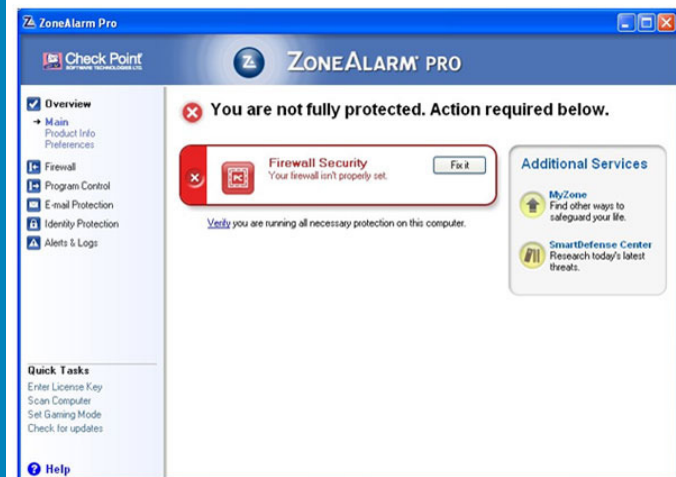

Stops Internet attacks at the front door and even catches thieves on their way out. Our 2-way firewall proactively protects against inbound and outbound attacks while making you invisible to hackers.

- ✓ **Inbound & Outbound** – monitors and blocks threat traffic in or out.
- ✓ **Full Stealth Mode** – makes you invisible to hackers.
- ✓ **Kill Controls** – instantly disable malicious programs.
- ✓ **Passes Independent Leak Tests\*** – passes 100% of tests compared to an industry average of 40%.

### ➤ Wireless PC Protection

Connecting to an unsecured network leaves you vulnerable to hackers, identity thieves, and other online threats. Automatic Wireless Network Security detects wireless networks and automatically applies the most secure firewall protection setting.

- **SmartDefense™ Service** provides real-time security updates, quick response to breaking threats, and leverages threat data from millions of users to protect your PC from the latest attacks.

## Browser Security

- **Advanced Download Protection**  
Automatically analyses your downloads to determine if they are safe or malicious. Includes an advanced security check that runs and analyses the download in a protected environment.
  - ✓ **Instant Security Check** – Automatically checks programs you download through your web browser with a list of known dangerous downloads and intelligently analyses the program itself.
  - ✓ **Deep Security Check** – Provides an option to run the download in a virtual protected environment to more deeply analyse it for malicious behaviour.
  
- **Dangerous Web Site Detection**  
Blocks spyware distribution sites and fraudulent "phishing" websites that trick you into revealing personal data.
  - ✓ **Anti-phishing** – Warns you and blocks fraudulent "phishing" websites that trick you into revealing personal data. Advanced heuristics detect brand new phishing sites created seconds ago that standard anti-phishing security misses.
  - ✓ **Spy-site Blocking** – Warns you and blocks web sites that are known to distribute spyware.
  - ✓ **Site Authentication** – One-click tells you when a site was registered, where, and if it is known to be dangerous.

## Ease of Use

- **Automatic Operation**  
Focus on what you want to do, we take care of the rest.
  - **Quiet Security** – Reduced the number of program alerts users see by over 90%.
  - **Millions of Programs Pre-Set** – Automatically configures security settings for millions of programs.
  - **Auto-Learn Mode** – Automatically configures security settings based on your behavior so you don't have to.
  - **Automatic Updates** – Automatically keeps your security lists up-to-date of viruses, spyware, dangerous programs, phishing and spy sites.
  
- **User-Friendly Interface**  
Easy for anyone to use and customise.
  - **One-Click Fix It Interface** – provides simple overview, 1 button access to instant upgrades and updates.
  - **Game Mode** – one-click control temporarily suppresses most security alerts and prevents them from interrupting your fun while maintaining protection for your PC.
  - **Customisation and Advanced Controls** – provides options for average consumers and advanced users to customise and adjust settings.

### System Requirements:

Windows® XP: Home/Professional Editions, SP2 or SP3 32-bit, 1GB RAM, 1 GHz or faster processor, 250MB of available hard-disk space, Internet Access, DVD or CD-ROM drive. Windows® Vista®: Business/Home Premium/Ultimate editions, SP1 or SP2, 32-bit, 2GB RAM /64-bit, 4GB RAM, 2 GHz or faster processor, 250MB of available hard-disk space, Internet access, DVD or CD-ROM drive. Windows® 7: 32-bit/64-bit, 2GB RAM, 2 GHz or faster processor, 250MB of available hard-disk space, Internet access, DVD or CD-ROM drive
